For the source, configure them to allow incoming traffic from your IP address.

EC2 > Instances > Launch an instance > Compare security group rules

We'll be creating a dedicated system *tomcat* user and group.

```
sudo groupadd --system tomcat
sudo useradd -d /usr/share/tomcat -r -s /bin/false -g tomcat tomcat
```

Confirm creation:

```
$ getent passwd tomcat

$ getent group tomcat
